

SHIELD SOURCE INCORPORATED

MODEL IDL & IDL-R SELF-LUMINOUS PATHWAY MARKERS

Non-electric, maintenance free! Free energy for 20 years.

Shield Source self-luminous IDL and IDL-R identification lights are designed to aid in the identification of emergency escape routes. They can also be used to identify the location of emergency equipment such as Fire Extinguishers, First Aid Kits, Fire Hoses or anything that could be useful when little or no ambient light exists in emergency situations. Unlike the photo luminescent markers, the IDL and IDL-R model markers will not diminish in light output after a few minutes but will maintain its luminance throughout any emergency situation. They require no external energy source, no electrical wiring or batteries and are always ready to provide effective and efficient maintenance free marking systems. Your first cost is your last cost! The high impact resistant polycarbonate housing offers a unit that is entirely sealed at the factory discouraging vandalism. Mounting hardware is standard and is packaged with each unit.
